

## LSIP-82/1 - Air Coil

OFC

Air core coil, 0.82 mH

Medium wire thickness (1 mm), for general applications, for constructing high-quality crossover networks of high power rating.

## Technical data:

|                           |                               |
|---------------------------|-------------------------------|
| Description               | : air core coil               |
| Nominal value             | : 0.82 mH                     |
| Rated voltage             | : -                           |
| Power rating              | : 150 W                       |
| Frequency range           | : -                           |
| Housing                   | : -                           |
| Colour/colour coding      | : -                           |
| Enam. copper wire(CUL)    | : $\sim 1.0$ mm               |
| DC resistance             | : 0.5 Ohm                     |
| Saturation current(50 Hz) | : -                           |
| Primary                   | : -                           |
| Secondary                 | : -                           |
| Pin spacing               | : -                           |
| Packing unit              | : 1                           |
| Dimensions                | : $\sim 48$ mm x $\sim 19$ mm |
| Weight                    | : 145 g                       |
| Pos.                      | : -                           |
| Other features            | : -                           |
