

MRH-170 - PA Mid/Highrange Horn

PA mid-high range horn

- Horn made of ABS plastic
- Driver connection via 35 mm (1 1/8") standard thread
- Consistent radiation pattern
- Recommended crossover frequency: 1.5 kHz
- Can be mounted when turned by 90°

Klang+Ton 02/2018

"The natural sound of the speaker (speaker building concept Monolith of Klang+Ton) is kept up to levels which can simply not be reached with standard hi-fi speaker systems, not even with full-fledged floor-standing

speaker systems. Thus, a rock concert with original volume levels is just as much fun as a classical concert virtually in the middle of an orchestra. (Speaker building concept Monolith with TF-1525, TF-0420MR, CDX1-1010 and MRH-170)."

Technical data:

Frequency range	: 1,000-20,000 Hz
Mounting cutout	: \varnothing 155 mm
Mounting depth	: 86 mm
Radiation angle (vert./hor.)	: 50°/80°
Dimensions	: 178 x 178 x 88 mm
Weight	: 0.195 kg
