

## LSIF-150/1 - Ferrite Inductor

OFC

Ferrite core coil, 1.5 mH

Very small design, e.g. for car hi-fi crossover networks up to medium power rating or as parallel components.

## Technical data:

|                           |                               |
|---------------------------|-------------------------------|
| Description               | : ferrite core coil           |
| Nominal value             | : 1.5 mH                      |
| Rated voltage             | : -                           |
| Power rating              | : 60 W/30 W                   |
| Frequency range           | : -                           |
| Housing                   | : -                           |
| Colour/colour coding      | : -                           |
| Enam. copper wire(CUL)    | : $\varnothing$ 0.65 mm       |
| DC resistance             | : 0.35 Ohm                    |
| Saturation current(50 Hz) | : -                           |
| Primary                   | : -                           |
| Secondary                 | : -                           |
| Pin spacing               | : -                           |
| Packing unit              | : 1                           |
| Dimensions                | : $\varnothing$ 26 mm x 26 mm |
| Weight                    | : 43 g                        |
| Pos.                      | : -                           |
| Other features            | : -                           |
